Vision Statement:

For cell phone users of all ages who want to improve the quality of their grocery shopping by making it faster and easier. The Shopping & Grocery app is a mobile application allow users to keep track with their shopping list. Making a list can help you to classify and focus on the items you need to buy etc. Unlike traditional mobile application such as “Shopping List” and “Grocery Shopping List Ease”, our product allows users a lot of the features that will make the using of Shopping & Grocery List app easier and more enjoyable to use.

Categories of Users:

Common people - with little knowledge about handling the device.

Actor-goal list:

Actor	Goal
Shopping list user	Create a list
	Browse list of available items
	Chose products
	Adding item details
	Deleting item
	Adding note
	Sorting items
	Showing the items prices
	Sharing list
	Deleting list
	Rename list

User Stories:

Estimated Effort: 12 Story Points As a user, I want to be able to choose products that I want from a list of products.	Estimated Effort: 20 Story Points As a user, I would like to be to take photo and record video.
Estimated Effort: 20 Story Points As a user, I would like to be able to add notes.	Estimated Effort: 15 Story Points As a user, I want to be able to use the alarm and reminder for shopping.
Estimated Effort: 20 Story Points As user, I would like to be able to add the goods' prices.	Estimated Effort: 14 Story Points As a housewife, I want to be able to add the location of groceries shopping.
Estimated Effort: 15 Story Points As a user, I would like to be able to sort products.	Estimated Effort: 17 Story Points As user, I want the app is will designed and easy to use.
Estimated Effort: 14 Story Points As a husband, I would like to be able to share and print my shopping list.	Estimated Effort: 16 Story Points As a housewife, I want to be able to reset my password easily and safely.
Estimated Effort: 17 Story Points As user, I want to be able to add a record sound.	Estimated Effort: 20 Story Points As a housekeeper, I want to be able to add images
Estimated Effort: 14 Story Points As a housewife, I would like to be able to draw.	

Product Backlog:

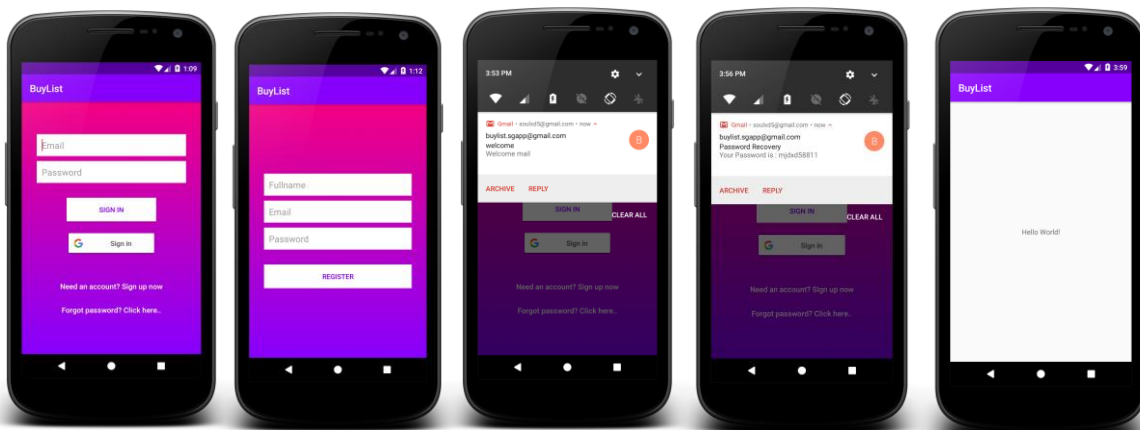

Story ID	Story	Story Points	Priority	Status
S1	Allow user to sign in	18	1	completed

Sprint #1

Sprint Backlog

Story ID	Story / Task	Estimated Hours	Actual Hours
S1	Designing user signing in UI.	6	6
	Allow the user to sign in by google account	8	17
	Adding sign in google button	2	2
	Allow the user to sign in by any account	8	11
	Adding the sign in button	2	2
S2	Designing user account UI	7	7
	Adding create account button.	2	2
	Allow the user to add his name, email and password	5	6
	Adding register button	2	2
	Sending welcome message by the user email.	9	12
	Adding the forget password button.	1	1
	Allow the user to receive the forgotten password by an email	8	10

Review:

Retrospective:

For this iteration, I planned to complete the two stories S1 and S2, and I almost finished from all the tasks except "Allow the user to sign in by google account". I'm planning to fix this task with another sprint letter. I spent too much time more than I planned on how to make the application send the welcome message and the password to the user. Also, I added two more tasks under the S2. I added the forget password button to help the user when he forgets his account. In my opinion, this experience helped me to learn more.

Project velocity: 19

Sprint# 2

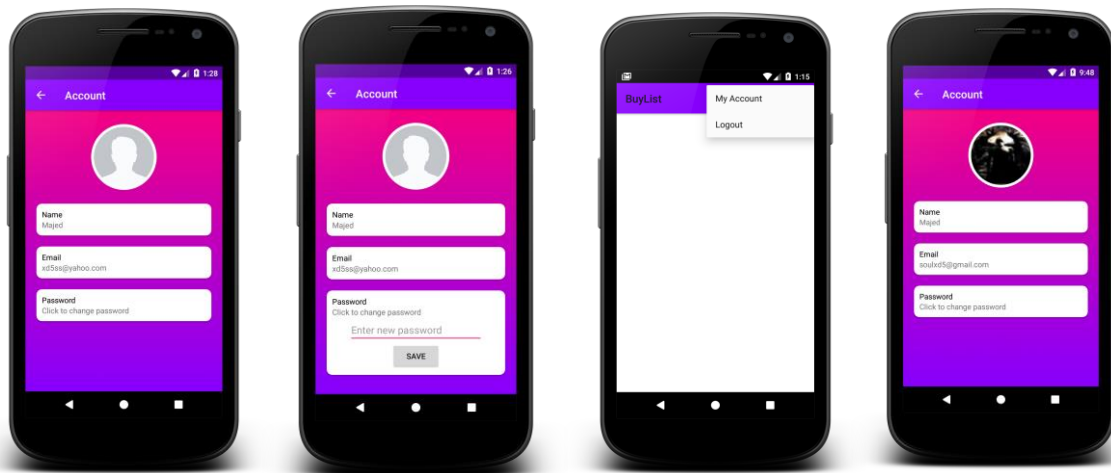

Sprint Backlog

Story ID	Story / Task	Estimated Hours	Actual Hours
S3	Adding sign out button	1	1
	Allow the user to Sign out the app	6	7
	Adding the account button	1	1
	Designing user account in UI.	5	9
	Adding the user account information in the account UI.	7	11
	Adding the return button in the account UI.	1	1
S4	Adding the reset password button in account UI	1	1
	Allow the user to change the password in account UI	10	13

Sprint Goal:

The user can see his account information, also he can reset and change his password.

Review:

Retrospective:

For this iteration, I planned to complete the two stories S4 and S5, and both of the stories are completed. I spent more times than I was planned on designing the account UI.

Project velocity: 35

Sprint# 3

Sprint Backlog

Story ID	Story / Task	Estimated Hours	Actual Hours
S12	Adding the deleting account button in Account UI	1	1
	Allow the user to delete his account	13	15
S5	Design the My Lists UI	5	5
	Allow user to create a shopping list.	8	10
	Allow the user to see the number of items in each list.	5	7
	Allow the user to rename a shopping list	6	6
	Allow the user to delete list.	9	9
S7	Design the shopping list UI.	5	5
	Allow the user to add item from the items list	11	18
	Allow the user to write item.	6	7
	Adding a return button to the My Lists UI.	3	3

Review:

Sprint Goal:

The user can create his shopping lists and adding items for shopping.

Retrospective:

For this iteration, I planned to complete the three stories S5, S7 and S12 and all of the stories are completed. I spent more times than I was planned. I faced some difficulty with creating the shopping list and allowing the user to adding items in the list, but everything is work correctly.

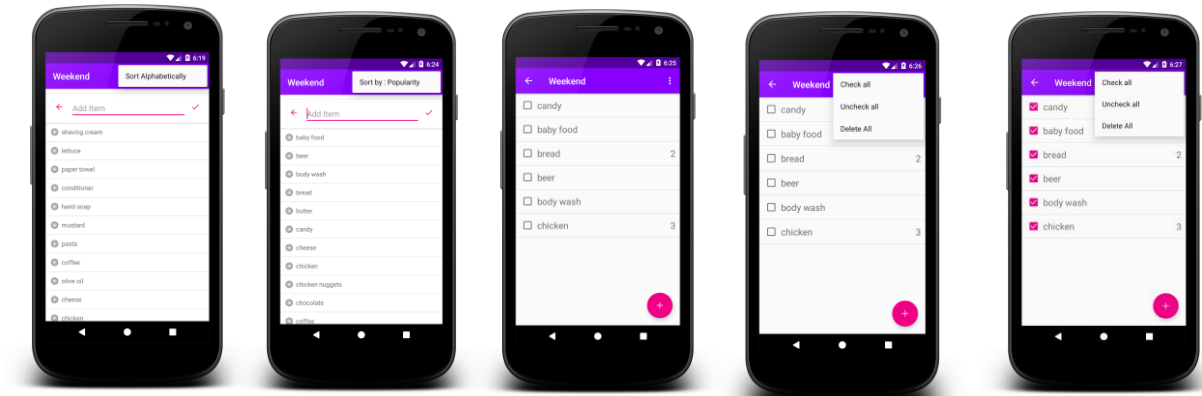

Project velocity: 47

Sprint# 4

Sprint Backlog

Story ID	Story / Task Allow user to add item by sort area of interest	Estimated Hours	Actual Hours
S6	Adding the sort button	1	1
	Allow the user to sort the items (By popular and Alphabetically)	20	20
S9	Adding check all button for the items	1	1
	Adding delete all button for the items	1	1
	Adding uncheck all button for the items	1	1
	Allow the user to check all the items	8	10
	Allow the user to delete all the items	9	10
	Allow the user to uncheck all the items	6	8

Review:

Sprint Goal:

The user is able to choose items by popular or alphabetically.

Retrospective:

For this iteration, I planned to complete the two stories S6 and S9 and all of them are completed. I spent more times than I was planned on the check all, uncheck all, and delete all items.

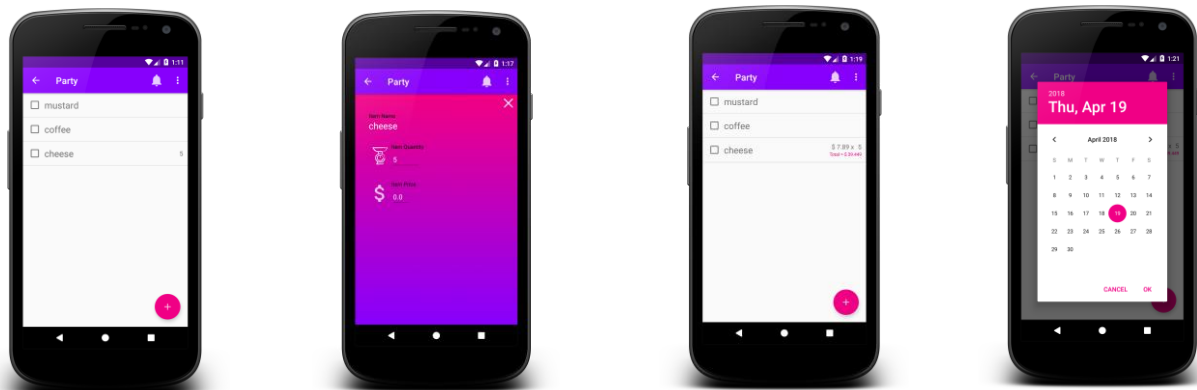

Project velocity: 35

Sprint# 5

Sprint Backlog

Story ID	Story / Task Allow user to add item by sort area of interest	Estimated Hours	Actual Hours
S8	Designing the item details UI	4	6
	Adding a return button to the shopping list UI	2	2
	Showing the item name	3	4
	Allow the user to add the quantity for each item	5	7
	Allow the user to add the item price for each item	6	8
	Allow the user to see the item price in the items list and the total price.	9	14
S10	Adding the remainder button.	2	2
	Allow the user to add a remainder for the shopping list	8	16

Review:

Sprint Goal:

The user is able to see the price and the total of item price.

Retrospective:

For this iteration, I planned to complete the two stories S8 and S10 and all of them are completed. I spent too much time on these two stories more than I planned, but everything is working smoothly.

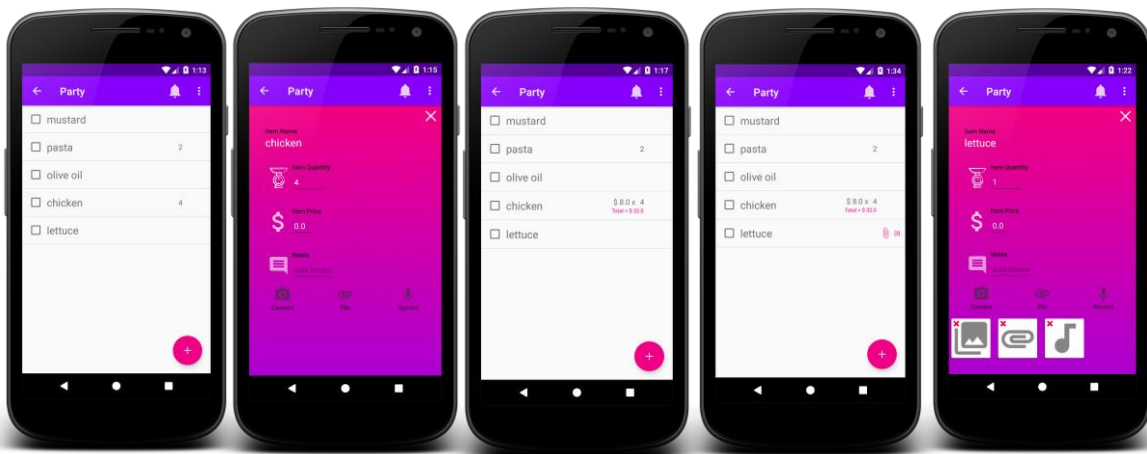

Project velocity: 37

Sprint# 6

Sprint Backlog

Story ID	Story / Task Allow user to add item by sort area of interest	Estimated Hours	Actual Hours
S11	Adding the share button in each shopping list (Rename, Delete, Share).	4	5
	Allowing the user to share a shopping list	10	13
S1	Allow the user to sign in by google account	8	17
S13	Allowing the user to add note for each item.	12	14
	Allowing the user to take photo.	16	18
	Allowing the user to add documents.	16	17
	Allowing the user to add a voice record.	14	14
	Showing the user if there are notes and attachments for each shopping list.	6	9

Review:

Sprint Goal:

The user is able to add notes and share his shopping list.

Retrospective:

For this iteration, I planned to complete the two stories S11, S1 and S13 and all of them are completed. I spent too much time on these two stories more than I planned, also I fixed the problem with allowing the user to sign in by using Google account directly.
